

# FEATURES & BENEFITS

## EMERGENCY CALL

In an emergency, use the KPB to connect with the security desk or 911. The KPB sends your live location, medical info and opens up a two-way call through the device. Your supervisors will also be notified when an alert is triggered.

## NOTIFY YOUR CO-WORKERS

Send a discreet SOS text message to your co-workers in uncomfortable situations. The text includes your live location so they can take action to help you out.

## FAKE-A-CALL

Dealing with an inappropriate patient? Use the KPB to place a fake phone call and excuse yourself from the situation. Whether its your supervisor or significant other, take the call and make your exit.

## FIND YOUR KEYS

Clip the KPB to your keys and use the app to find them. See the last place you had your keys on a map and make the KPB ring when you get close. Also works for a name badge, door fob, backpack, brief case, etc.

## SILENT ALARM

The KPB can also call for help silently. Security will hear everything and see your location on a map, but only you will know an alert was triggered and that help is on the way.

## WALKING ESCORT

Set a destination and the KPB becomes your virtual guardian, whether it's to your car in the parking garage or in a room with a patient one-on-one. If you don't deactivate the timer, security is notified and live location will be sent.

## MASS BROADCAST

Your organization can send critical information audibly through the POM's speakers and through a push notification in the event of an crisis. Whether it's a lock down or other emergency, your team will get the message fast.

## ATTRACTIVE & COMPACT

The KPB was designed with today's health care employee in mind, with a sleek, small and portable design that easily clips onto an ID badge, lanyard or key chain.
